MIKE AUGUST, **Manager, Technical Services, Total Power Ltd.**

Mike has been in the power generation field for over 34 years, EGSA certified, and a Generac Certified Master technician and trainer. Mike is also a member of both the CSA C282 technical committee and CSA B138 technical committee and a founding member of the Fleming College EPG advisory council.

Mike will be presenting the maintenance requirements outlined in the CSA-C282 Standard. This will cover fuel storage, weekly inspections, monthly inspections and testing including semi-annual and annual maintenance and testing requirements. Mike will also outline changes within the latest 2015 version.
